

## TECAPET® PET and 1400® PET (Polyethylene Terephthalate)

TECAPET®/1400® are both unreinforced, semi-crystalline thermoplastic polyester derived from polyethylene terephthalate. Their excellent wear resistance, low coefficient of friction, high flexural modulus, and superior dimensional stability make it a versatile material for designing mechanical and electro- mechanical parts. Because TECAPET®/1400® has no centerline porosity, the possibility of fluid absorption and leakage is virtually eliminated.

- Excellent wear resistance
- Very good chemical resistance
- High mechanical strength
- In compliance with FDA regulations CFR 177.1630 for use in contact with food
- No centerline porosity eliminates the possibility of fluid absorption and leakage
- Low coefficient of friction
- Excellent hardness and stiffness
- Good weather resistance
- Good electrical insulator
- Low water absorption
- Good resistance to high-energy radiation

TECAPET®/1400® both have superior wear resistance and lack of centerline porosity give it an advantage over other materials for applications involving solvents, chemicals, and food products. TECAPET®/1400® can also be used in water purification systems, printing equipment, textile components, food-handling equipment, and valves.

Primary Specification (Resin) (Typical): ASTM-D-5927 TPES0211

Shapes Specification (Typical): ASTM-D-6261 S-TPES0211

Property	ASTM Test Method	Units	TECAPET® PET	1400HI® PET
<b>Physical</b>				
Density	D792	lbs/in <sup>3</sup>	0.0499	0.051
